XXL-Rehab Low walker

Strongly engineered and functionally designed exclusively for bariatric users!

Especially after falling incidences, fractures etc one of the key factors of getting bariatric users mobilised is to provide them with a walking aid they trust.

The XXL-Rehab Low walker signalises stability with its broad base, 32 mm tubing and only 2 wheels. It rolls easily but when stability is needed – during the swing-through fase of walking – its stability is unique.

The two legs at the back ensure that it doesn't suddenly roll away in case of overbalance, and the two front wheels make it very easy to manoeuvre.

Nice wide padded handgrips give a larger surface to distribute the load and ensure a minimum of kick back into the palm of the hands.

Using 32 mm tubing ensures an almost forever lasting frame, but also gives a much more simple look and it can be cleaned in few seconds.

Adjustable from 78 cm to 101 cm with no use of tools.

For transport it can be separated into 2 parts, still without use of tools.

XXL-Rehab Low walker	
Maximum weight-bearing capacity is	325 kg
Width	76 cm
Height - adjustable	78-101 cm
Color *	Green/Silver
Order No	GRXLLW

** Powder coating and few tubings help protecting our environment and natural resources.*

XXL REHAB
STAND TALL

NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW · NEW

XXL-Rehab Stand Tall

Strongly engineered and functionally designed exclusively for bariatric users!

The XXL-Rehab Stand Tall is a multi-functional aid; It can be used for walking, mobilising from seated to standing, it is safe to use, gives independence and has an IV option.

The XXL-Rehab Stand Tall has 2 built-in handgrips on the side which allow the user to stand up in small steps from the bed or chair being in full control of the situation. This minimises the risk of falling and therefore also minimises the risk of injury to caregiver or patient himself. Once upright the user can walk around.

The underarm-padding is adjustable in width and angle giving optimal support to the user. This function is supported in full length of the bar.

In addition, it has many handgrip-combinations and easy adjustment, everything to make the XXL-Rehab Stand Tall easy to manoeuvre.

The brakes are mounted onto the bar, useful in stops of course, but also in speed control and turning: the XXL-Rehab Stand Tall is a safe zone. The brakes can be locked, i.e. when getting up/sitting down.

Using 32 mm tubing ensures an almost forever lasting frame, but also gives a much more simple look and it can be cleaned in few seconds.

IV holder and holder for urine-bag are optional.

The XXL-Rehab Stand Tall is mainly designed for hospital use, but can be used at home as well.

XXL-Rehab Stand Tall
